

## SUBJECT AND AUTHOR INDEX FOR VOLUME 17, 1985

- A:B ratio, 189-198
- Alaska: Pingos in Prudhoe Bay area, 321-336; *Populus balsamifera*, 271-278; Soil temperature model, 425-432; Tundra plants, 199-204; Tussocks, 1-5, 7-17
- Air avalanching, 125-134
- Air pollution: Effect in lichenometry, 99-106
- Alberta: Geomorphology, 205-210; Paleoenvironment, 49-67
- Alpine: Plants, 251-260; Treeline, 389-400; Turf-banked terraces, 261-270; Tundra surfaces, 433-442, 443-450
- Andes: Vegetation, 189-198
- Antarctic: Plants, 401-416
- Arctic: Glacier ice, 89-98; Glaciation level, 311-319; Pingos, 321-336; Plant growth, 241-250; Pollen deposition, 279-287; Prehistory, 357-370; Soil temperature, 425-432; Vegetation change, 357-387
- Ayers, M. P. See MacLean, S. F., Jr. and Ayers, M. P.
- Beget, J. E. (Tephrochronology of antislope scarps on an alpine ridge near Glacier Peak, Washington, U.S.A.), 143-152
- Belowground phytomass, 189-198
- Betula glandulosa*, 279-287
- Book Reviews
- The Antarctic Circumpolar Ocean*. G. Deacon, 472
- Antarctic Earth Science: Fourth International Symposium*. R. L. Oliver et al. L. Osterman, 115-116
- The Archaeology of Colorado*. E. S. Cassells, T. Lennon, 117
- The Arctic and the Rockies as Seen by a Botanist: Pictorial*. I.-C. Chung. W. A. Weber, 220
- Arctic Whaling*. H. K. s'Jacob et al., 472
- An Arctic Whaling Diary: The Journal of Captain George Comer*. W. G. Ross. I. Whitaker, 472
- Australia's Antarctic Policy Options*. S. Harris, 222
- Catchment Experiments in Fluvial Geomorphology*. T. P. Burt and D. E. Walling. E. D. Andrews, 349
- The Climate of Europe: Past, Present and Future*. H. Flohn and R. Fantechi. R. G. Barry, 469-470
- Climatic Changes on a Yearly to Millennial Basis*. N.-A. Möner and W. Karlén. R. S. Bradley, 468-469
- Contributions to the Tectonics and Geophysics of Mountain Chains*. R. D. Hatcher, Jr. et al. J. T. Andrews, 119
- Destructive Mass Movements in High Mountains*. G. H. Eisbacher and J. J. Clague. M. J. Bovis, 470
- Dr. John Rae*. R. L. Richards. A. G. E. Jones, 471-472
- Drumlins: A Bibliography*. J. Menzies, 222
- Erosion and Sediment Yield: Some Methods of Measurement and Modelling*. R. F. Hadley and D. E. Walling. S. Morris, 117-118
- Field and Theory: Lectures in Geocryology*. M. Church and O. Slaymaker. N. Caine, 471
- From Grassland to Glacier: The Natural History of Colorado*. C. F. Mutel and J. C. Emerick. D. J. Cooper, 116
- Glacial Lake Agassiz*. J. T. Teller and L. Clayton. J. T. Andrews, 114-115
- The Glaciers of Equatorial East Africa*. S. Hastenrath. W. C. Mahaney, 221
- Glossary of Landscape and Vegetation Ecology*. H. W. Gabriel and S. S. Talbot, 222
- Ice Sheets of the Continental Shelves*. M. G. Grosval'd. J. T. Andrews, 217-219
- The International Karakoram Project*. K. J. Miller. J. T. Andrews, 217
- Late Quaternary Environments of the Soviet Union*. A. A. Velichko. J. T. Andrews, 347
- Mesoformen des Reliefs im heutigen Periglazialraum*. H. Poser and E. Schunke, 119
- Mountain Ecosystems: Stability and Instability*. B. Messerli and J. D. Ives. C. V. Cogbill, 351-352
- Past and Present Vegetation of the Far Northwest of Canada*. J. C. Ritchie. D. A. Walker, 349-350
- Permafrost: Fourth International Conference Final Proceedings*, 472
- A Phytogeographical Study of South Greenland: Vascular Plants*. J. Feilberg, 222
- The Pleistocene: Geology and Life in the Quaternary Ice Age*. T. Nilsson. W. R. Farrand, 348
- Proceedings of the First International Muskox Symposium*. D. R. Klein et al., 222
- Quaternary Paleoclimatology: Methods of Paleoclimatic Reconstruction*. R. S. Bradley. T. Webb III, 467-468
- Rastitel'nost' Poliarnykh Pustyn SSSR [Vegetation of Polar Deserts of the USSR]*. V. D. Aleksandrova. J. Major, 350-351
- Resources and Dynamics of the Boreal Zone*. R. W. Wein et al. G. P. Kershaw, 219
- Rocky Mountain National Park*. C. W. Buchholtz, 119
- Soils and Geomorphology*. P. W. Birkeland. E. Maltby, 113-114
- Bliss, L. C. See Grulke, N. E. and Bliss, L. C.
- Brazel, A. J. See Nickling, W. G. and Brazel, A. J.
- Caine, N. See Reddy, M. M., et al.
- Canada: Baffin Island, tundra, 279-287; Labrador prehistory, 357-370; High arctic saxifrages, 241-250; Rocky Mountains, geomorphology, 205-210; Victoria Island, relic glacier ice, 89-98. See also provinces.
- Chapin, F. S., III. See Mark, A. F., et al.
- Clapperton, C. M. and McEwan, C. (Late Quaternary moraines in the Chimborazo area, Ecuador), 135-142
- Clay minerals, 153-163
- Climate: Effect on soil temperature, 425-432; Greenland, 311-319
- Colobanthus quitensis*, 401-416
- Colorado: Alpine tundra surfaces, 433-442, 443-450; Geomorphic studies, 179-188; Neoglaciation, 69-78; Paleoenvironment, 31-48; Patterned ground, 153-163; Precipitation chemistry, 79-88; Rock glacier fabric, 165-177; Treeline regeneration, 389-400
- Critical reviewers, list, 120
- Culture change, Labrador, 357-370
- Daly, C. and Shankman, D. (Seedling establishment by conifers above tree limit on Niwot Ridge, Front Range, Colorado, U.S.A.), 389-400
- Darmody, R. G. See Thorn, C. E. and Darmody, R. G.
- Dating methods: Tephrochronology, 143-152
- Demeur, P. See Lorrain, R. D. and Demeur, P.
- Dendrochronology, 271-278
- Deschampsia antarctica*, 401-416
- Disturbance, 199-204
- Dowdeswell, E. K. See Jacobs, J. D., et al.
- Dryas octopetala*, 229-239
- Dunwiddie, P. W. See Edwards, M. E. and Dunwiddie, P. W.
- Ecology: Antarctic plants, 401-416; Arctic saxifrages, 241-250; *Dryas octopetala*, 229-239; Eco-types, 229-239; Lichen, 417-

- 424; Páramo vegetation, 189-198; Treeline dynamics, 389-400; Tussock tundra, 1-5, 7-17
- Ecuador: Quaternary moraines, 135-142
- Edwards, M. E. and Dunwiddie, P. W. (Dendrochronological and palynological observations on *Populus balsamifera* in northern Alaska, U.S.A.), 271-278
- Eigenvalue analysis: Rock glacier fabric, 165-177
- Elias, S. A. (Paleoenvironmental interpretations of Holocene insect fossil assemblages from four high-altitude sites in the Front Range, Colorado, U.S.A.), 31-48
- Eolian influx, 433-442
- Eolian lag surfaces, 443-450
- Eriophorum vaginatum*, 1-5, 7-17
- Everett, K. R. See Walker, D. A., et al.
- Falkland Islands, 107-111
- Fetcher, N. (Effects of removal of neighboring species on growth, nutrients, and microclimate of *Eriophorum vaginatum*), 7-17; See also Mark, A. F., et al.
- Field manipulations, 229-239
- Fitzhugh, W. W. and Lamb, H. F. (Vegetation history and culture change in Labrador prehistory), 357-370
- Flora: Teton Range, 19-30
- Floristic analysis, 19-30, 251-260
- Frank, T. D. and Thorn, C. E. (Stratifying alpine tundra for geomorphic studies using digitized aerial imagery), 179-188
- Freeze-thaw, 337-346
- Frost shattering, 337-346
- Fox, J. F. (Plant diversity in relation to plant production and disturbance by voles in Alaskan tundra communities), 199-204
- Gardner, J. S. See Smith, D. J. and Gardner, J. S.
- Giardino, J. R. and Vitek, J. D. (A statistical interpretation of the fabric of a rock glacier), 165-177
- Geomorphology: Alpine, 143-152, 179-188; Glacial, 289-310; Pingo, 321-336; Rock glacier, 165-177; Sediment transport, 205-210; Turf-banked terraces, 261-270
- Glacial geomorphology: Ungava, 289-310
- Glacial streams, 451-466
- Glaciation level: Greenland, 311-319
- Glacio-isostatic warping, 289-310
- Grain-size: Distribution, 433-442; Sampling, 443-450
- Gray, J. T. and Lauriol, B. (Dynamics of the late Wisconsin ice sheet in the Ungava Peninsula, interpreted from geomorphological evidence), 289-310
- Greenland: Glaciation level, 311-319
- Ground squirrels: Burrowing effects, 205-210
- Grulke, N. E. and Bliss, L. C. (Growth forms, carbon allocation, and reproductive patterns of high arctic saxifrages), 241-250
- Haines-Young, R. H. (Discussion of "Size variation of *Rhizocarpon* on moraine slopes in southern Norway": A reply), 212-216
- Hansen-Bristow, K. J. and Price, L. W. (Turf-banked terraces in the Olympic mountains, Washington, U.S.A.), 251-260
- Harris, S. A. (Evidence for the nature of early Holocene climate and paleogeography, High Plains, Alberta, Canada), 46-67
- History: Dutch whaling, 371-387
- Holocene: Insect fossils, 31-48; Paleoclimate, 49-67, 69-78
- Hydrology: Channel adjustment, 451-466
- Humlum, O. (The glaciation level of West Greenland), 311-319
- Ice: Origin of ground ice, 89-98; Soluble isotopes, 89-98; Stagnation, 49-67
- Ice-cemented rock glacier, 165-177
- Ice-load transport, 451-466
- Innes, J. L. (An examination of some factors affecting the largest lichens on a substrate), 98-106; (Moisture availability and lichen growth: The effects of snow cover and streams on lichenometric measurements), 417-424
- Insect fossils, 31-48
- Jackson, L. E. (Floristic analysis of the distribution of ephemeral plants in treeline areas of the western United States), 251-260
- Jacobs, J. D., Mode, W. N., and Dowdeswell, E. K. (Contemporary pollen deposition and the distribution of *Betula glandulosa* at the limit of low arctic tundra in southern Baffin Island, N.W.T., Canada), 279-287
- Jelinski, J. C. See Reddy, M. M., et al.
- Klinger, L. F. See Smith, J. M. B. and Klinger, L. F.
- Komárková, V., Poncet, S., and Poncet, J. (Two native antarctic vascular plants, *Deschampsia antarctica* and *Colobanthus quitensis*: A new southernmost locality and other localities in the Antarctic Peninsula area), 401-416
- Knighton, A. D. (Channel form adjustment in supraglacial streams, Austre Okstindbreen, Norway), 451-466
- Krummholz, 389-400
- Labrador prehistory, 357-370
- Lamb, H. F. See Fitzhugh, W. W. and Lamb, H. F.
- Late Wisconsin ice sheet, 289-310
- Laurentide Ice Sheet, 289-310
- Lauriol, B. See Gray, J. T. and Lauriol, B.
- Lichenometry: Techniques, 99-106, 211-216, 417-424
- Liebermann, T. D. See Reddy, M. M., et al.
- Lorrain, R. D. and Demeur, P. (Isotopic evidence for relic Pleistocene glacier ice on Victoria Island, Canadian Arctic Archipelago), 89-98
- MacLean, S. F., Jr. and Ayers, M. P. (Estimation of soil temperature from climatic variables at Barrow, Alaska, U.S.A.), 425-432
- Mahaney, W. C. and Spence, J. R. (Discussion of "Size Variation of *Rhizocarpon* on moraine slopes in southern Norway" by R. H. Haines-Young), 211-212
- Marine limits: Ungava, 289-310
- Mark, A. F., Fletcher, N., Shaver, G. R., and Chapin, F. S., III (Estimated ages of mature tussocks of *Eriophorum vaginatum* along a latitudinal gradient in central Alaska, U.S.A.), 1-5
- Mass wasting, 143-152
- McEwan, C. See Clapperton, C. M. and McEwan, C.
- McGraw, J. B. (Experimental ecology of *Dryas octopetala* ecotypes. III. Environmental factors and plant growth), 229-239
- McGreevy, J. P. and Whalley, W. B. (Rock moisture content and frost weathering under natural and experimental conditions: A comparative discussion), 337-346
- Meteorology: Surface winds, 125-134
- Microclimate: Tussock tundra, 7-17
- Mode, W. N. See Jacobs, J. D., et al.
- Moraines: Ecuador, 135-142; Ungava, 289-310
- Neoglacial facies, 69-78
- Neoglacial succession: Teton Range, 19-30
- Nickling, W. G. and Brazel, A. J. (Surface wind characteristics along the Icefield Ranges, Yukon Territory, Canada), 125-134

- Norway: Lichen ecology, 417-424; Lichenometry, 211-216; Supraglacial streams, 451-466  
 Nutrient availability, 229-239  
 Nutrients in tundra tussocks, 7-17
- Olyphant, G. A. (Topoclimate and the distribution of Neoglacial facies in the Indian Peaks section of the Front Range, Colorado, U.S.A.), 69-78  
 Paleoenvironment: Alaska, 271-278; Baffin Island, 279-287; Colorado, 31-48; High Plains, 49-67; Labrador, 357-370; Ungava, 289-310  
 Paleobotany: Spitsbergen, 371-387  
 Palynology: Alaska, 271-278; Baffin Island, 279-287; Labrador, 257-370; Spitsbergen, 371-387  
 Páramo vegetation, 189-198  
 Particle size: Patterned ground, 153-163  
 Patterned ground, 153-163  
 Penguins, 107-111  
 Pingos, 321-336  
 Plant communities: Turf-banked terraces, 261-270  
 Plant diversity, 199-204  
 Plant growth, 229-239, 241-250  
 Plant life forms, 251-260  
 Plants: Antarctic localities, 401-416  
 Pleistocene: Relic glacier ice, 89-98  
 Pollen: *Betula glandulosa*, 279-287; *Populus balsamifera*, 271-278  
 Poncet, J. See Komárková, V., et al.  
 Poncet, S. See Komárková, V., et al.  
*Populus balsamifera*, 271-278  
 Prehistory: Labrador, 357-370  
 Price, L. W. See Hansen-Bristow, K. J. and Price, L. W.  
 Precipitation chemistry, 79-88  
 Precipitation pH, 78-88  
 Productivity, 199-204
- Quaternary: Moraines in Ecuador, 135-142. See also Holocene and Pleistocene
- Radiocarbon dates: Ecuador, 135-142; Spitsbergen, 371-387; Ungava, 289-310
- Reddy, M. M., Liebermann, T. D., Jelinski, J. C., and Caine, N. (Variation in pH during summer storms near the Continental Divide in central Colorado, U.S.A.), 79-88
- Remote sensing, 179-188
- Rhizocarpon*: Effect of moisture availability, 417-424; Size variation, 211-216
- Rissing, J. M. and Thorn, C. E. (Particle size and clay mineral distributions within sorted and nonsorted circles and surrounding parent material, Niwot Ridge, Front Range, Colorado, U.S.A.), 153-163
- Rock glacier fabric, 165-177
- Rock striations: Falkland Islands, 107-111
- Sackung, 143-152  
 Saxifrages, 241-250  
 Scotland: Lichenometry, 99-106  
 Seedling establishment: Treeline, 389-400  
 Shankman, D. See Daly, C. and Shankman, D.  
 Shaver, G. R. See Mark, A. F., et al.
- Smith, D. J. and Gardner, J. S. (Geomorphic effects of ground squirrels in the Mount Rae area, Canadian Rocky Mountains), 205-210  
 Smith, J. M. B. and Klinger, L. E. (Aboveground:belowground phytomass ratios in Venezuelan páramo vegetation and their significance), 189-198  
 Soil: Pingo, 321-336; Temperature, 425-432; Turf-banked terrace, 261-270  
 Spence, J. R. (A floristic analysis of Neoglacial deposits in the Teton Range, Wyoming, U.S.A.), 19-30  
 Spitsbergen: Paleoenvironment, 371-387  
 Spletstoesser, J. F. (Note on rock striations caused by penguin feet, Falkland Islands), 107-111  
 Subarctic: Prehistory, 357-370
- Tephrochronology, 143-152  
 Thorn, C. E. and Darmody, R. G. (Grain-size distribution of the insoluble component of contemporary eolian deposits in the alpine zone, Front Range, Colorado), 433-442; (Grain-size sampling and characterization of eolian lag surfaces within alpine tundra, Niwot Ridge, Front Range, Colorado, U.S.A.), 443-450; See also Frank, T. D. and Thorn, C. E. and Rissing, J. M. and Thorn, C. E.  
 Timberline dynamics, 389-400  
 Topoclimate, 69-78  
 Treeline: Changes, 31-48; Floristic analysis, 251-260; Regeneration, 389-400  
 Tropicalpine vegetation, 189-198  
 Turf-banked terraces, 261-270  
 Tussocks, 1-5  
 Tundra: Low arctic, 279-287; Pingos, 321-336; Plant diversity and production, 199-204; Tussocks, 1-5, 7-17; Vegetation, 179-188
- Ungava, 289-310
- Van der Knaap, W. O. (Human influences on natural arctic vegetation in the 17th century and climatic change since A.D. 1600 in northwestern Spitsbergen: A paleobotanical study), 371-387  
 Vegetation: Human influences on, 371-387; Páramo, 189-198; Pingo, 321-336; Tundra, 179-188, 199-204  
 Venezuela: Páramo vegetation, 189-198  
 Vitek, J. D. See Giardino, J. R. and Vitek, J. D.  
 Vole: Disturbance, 199-204
- Walker, D. A., Walker, M. D., Everett, K. R., and Webber, P. J. (Pingos of the Prudhoe Bay area, Alaska, U.S.A.), 321-336  
 Walker, M. D. See Walker, D. A., et al.  
 Washington: Cascade Range antislope scarps, 142-152; Turf-banked terraces, 261-270  
 Weathering: Experiments, 337-346; Rock moisture content, 337-346  
 Webber, P. J. See Walker, D. A., et al.  
 Whaling: Spitsbergen, 371-387  
 Whalley, W. B. See McGreevy, J. P. and Whalley, W. B.  
 Winds: Katabatic, 125-134
- Yukon: Winds along Icefield Ranges, 125-134
